

## HABRI Power Calculation Form

Submit a separate Power Calculation Form for each measure in your proposal. This form does not count towards the page limit of the proposal.

If you do not believe it is appropriate for your grant application to include sample size estimates, please include a brief explanation here.

If sample size estimates are necessary for your study, continue filling out this form.

Please clearly indicate the measure of interest on each form in the space below.

Proposed study design:

*Eg: case-control, randomized control trial,*

Sample type:

*Eg: a single group, two or more independent groups, matched pairs*

Analytic approach:

*Eg: t-test, logistic regression, non-parametric analysis*

Statistical test:

*Eg: a mean, a difference in means, a proportion, an odds ratio, a risk ratio*

Insert response:

Power (□):
Significance level (□):
Estimated (or desired) standard deviation:
Estimated detectable difference (if applicable):
Estimated between (within) subject correlation (if applicable):
<b>Estimated Sample size:</b>

Please discuss any additional assumptions that went into your power calculation.
